

The all-new **Freeway SA160C mini** is a compact sit to stand aid, which is very easy to manoeuvre.

Designed with support and comfort in mind, this compact stand aid helps and assists the user to gently move from a sitting to standing position.

When used in conjunction with the Freeway Thoracic Sling, this is the ultimate sit to stand combination.

The compact stand aid and sling work in harmony to provide a different lift experience, in that the user is naturally moved forwards and upwards, obtaining support in the lower back, under the feet and lower legs.*

The small adjustable carry bars are positioned at an angle so there is less pressure or drag under the arms, and provides a very gentle, safe and secure sit to stand.

The **Freeway SA160C mini** is manufactured in tubular steel for strength, stability and durability whilst maintaining the highest quality that's synonymous with the Freeway brand.

Key Benefits and Features

- Lifting capacity of 160kgs
- Gentle sit to stand action – safe and secure
- Compact and easy to manoeuvre - under 980 mm overall height
- Adjustable carry bar with 5 set positions
- Linak control box and actuator for smooth motion
- Soft, adjustable lower leg support with integral strap attachment points
- Low foot plate with anti-slip surface
- Electric leg opening
- Lockable rear castors

*Can be used with other mini lift slings.

FREEWAY Thoracic Sling

This is a versatile standing support sling which has been specifically designed to be used in conjunction with the Freeway SA-160C Stand Aid.

Designed for comfort and security, the Freeway Thoracic Sling provides added support around the lower back which helps users to stand slowly and gently.

From a sit to stand position all pulling movement is concentrated in the lower back area, so the sling does not ride up under the user's arms. This allows for a smooth and comfortable lift. The Freeway Thoracic Sling is made from durable polyester material for hygiene and safety.

The inner has a padded soft velour lining for additional care and comfort.

Added features include specially developed wrist cuffs for those needing extra support.

Key Benefits & Features

- Designed for comfort and security of the user
- Provides extra support to the lower back
- Does not ride up under the user's arms
- Facilitates toileting
- Durable polyester material
- Soft velour lining
- Wrist cuffs for additional support
- Embroidered laundry safe labels
- Can be used with a range of compact stand aid solutions.

Available in the following sizes:
S, M, L & XL
